Usman Ali

Senior Business Intelligence Analyst

Usmanali0808@outlook.com | +971 553914338 | Abu Dhabi, UAE

SUMMARY

Senior Business Intelligence Analyst with extensive experience in Power BI, Tableau, and SQL, delivering data-driven insights that improve decision-making and operational performance. Proven track record in designing automated reports, financial models, dashboards, and predictive analytics solutions, achieving up to 50% reduction in reporting time and resource savings. Skilled in process automation and stakeholder collaboration, driving measurable impact across finance and operations.

EXPERIENCE

ADNOC Sour Gas, Abu Dhabi **2022 - Present**
Senior Business Intelligence Analyst / Data Analyst

- Built financial and predictive models to track CAPEX/OPEX, contracts, and thus supported budgeting decisions and planning with accurate analysis.
- Developed Power Automate flows integrated with Power BI to automate notifications, send bulk emails, and trigger scheduled semantic model refreshes.
- Designed and deployed Power Apps canvas applications to capture KPI inputs from focal points and seamlessly integrate the collected data into Power BI dashboards for real-time visualization.
- Created Power BI Paginated Reports for monthly financial reporting, including GL-wise and cost-center-wise breakdowns, providing stakeholders with detailed, drill-down financial visibility.
- Enhanced User Experience for embedded analytics using exported HTML, iframe code, enabling custom refresh actions, interactive buttons, and tailored user functionality.
- Developed custom Power BI visuals to simplify complex datasets into intuitive KPI-driven insights tailored to organizational performance metrics and stakeholder requirements.
- Integrated streaming data, Data Activator triggers, and multiple data silos into unified semantic layers to support enterprise-grade analytics.
- Prepared business plans and senior management presentations, turning complex operational data, financial metrics into clear insights. Enabled leadership to align budgets with long-term goals.
- Integrated Honeywell's Uniformance PHD server with a semantic model to monitor flow rates, revenue, and production. This provided real-time analytics for forecasting and cost evaluation.
- Architected end-to-end Azure data pipelines integrating Dataflow Gen2, T-SQL, and Data Lakehouse structures to provide teams with seamless, automated access to enterprise-grade analytics.
- Led dashboard reviews and project reporting during shutdown phases, ensuring up-to-date insights for decision-making.
- Implemented KPI frameworks and automated workflows across operations, achieving 100% audit closeout and improved compliance readiness.

Aramex International Logistics, Dubai
Operations Executive Analyst

- Developed Power BI dashboards for finance, revenue, manpower, increasing overall revenue, efficiency and reducing manual reporting by 50%.
- Built global and regional dashboards for warehouse hubs to track production
- and operational performance.
- Improved team efficiency by 25% during peak seasons by providing data-driven insights and close collaboration with management.

- Designed and implemented B2B and B2C last-mile delivery tracking dashboards to measure shipment transit times and monitor overall delivery performance.
- Built Control Tower Visibility Dashboards enabling real time monitoring of shipment status for operations and control tower teams.
- Developed Shipment Tracking & Delivery Metrics frameworks to ensure SLA compliance and enhance end-to-end shipment visibility.

BrightHat, Chennai **2016 - 2018**

Customer Support Representative

- Responded promptly to complaints, feedback, documents and accountability of client services leading to an 85% score On CSAT data.
- Played a vital role in the management of client issues and provided complete assistance for client requirements.
- Analyzed video footage of 5+ retail stores to observe staff behavior in coordination with the HR team.
- Prepared Retail functions reports and updates on any irregularities.
- Proactively generated 50+ leads and expanded client network through marketing and client meetings.
- Best customer support representative - for providing outstanding customer support.
- Displayed exceptional communication skills and customer centric approach, achieved 90% first contact resolution.
